

Code grabber Pandora P24 NEW 2019 USA and EUROPE

Code grabber Pandora P24 2019

One of the best devices today is equipped with seven operating modes for intercepting the trouser signal and additionally installed alarms. It can cope with the opening of barriers and gates of various designs. You can buy Codegrabber Pandora 2016 in our store at the best price.

Features of the 2016 Pandora Code Grabber and price

The device is equipped with 40 memory locations, is capable of working from USB and charging from mini USB, remotely updated. To enable, you need an individual PIN, it runs on battery for up to 6 hours, a graphical interface on an LCD screen 30×16 mm. When the active mode is on, the grabber consumes a lot of energy. After decoding the signal, the device vibrates twice, it is possible to cancel the process. In the AUTO mode, each received signal is automatically recorded in the cell. Six convenient buttons are installed on the code grabber for menu control and quick settings. The receiver has a scanner with Firmware firmware with a large number of systems that can be tested for cryptographic stability. The convenient design placed in a compact keychain. Dimensions correspond to the original

Pandora alarm keychain. It can work with 4 radio frequencies allowed in Russia, catches AM and FM, within which 5 modes operate. The powerful antenna is made monolithic and works at a small and remote distance. On Codegrabber Pandora 2.4, the price will depend on the modification and the number of delivered alarms.

The answer to the main question:

On the expanses of the black market, it is possible to find a lot of proposed devices for the interception, the so-called code grabbers. Over the past couple of years, a large number of devices, key fobs, etc. have changed. But the main list of supported models is practically unchanged. Selling old in new packaging.

Pandora P24 device in the DXL 3970 case (D600-D605). This is a truly revolutionary device that has high efficiency, reliability, and reputation, which proves more than one year of adding new developments and the ability to update the device remotely without buying new questionable models that even do not have such capabilities nearby.

But far from the cheapest cost. As they say, "Good is never cheap." Where many manufacturers of the long-forgotten old, under the guise of a new one, embodied their old into the Pandora keychain and try to sell it as an expensive model, which could prove itself in the highest circles.

!!! Do not confuse the so-called code grabber Pandora 2.4 and 2.5 and others with Pandora P24 !!!

About Essentials:

In connection with the influx of the American automobile market both to Europe, Ukraine, and the CIS countries, the question has long been asked WHY! No 315 MHz and why P22 (BMW) in a separate device.

As noted earlier, progress does not stand still, with every day, hour, minute and second the future comes.

What the consumer wants: Maximum benefit, ease of use, versatility and the ability to upgrade for minimal money.

What has changed:

The device is also all made in the familiar Pandora DXL 3970 car alarm, but with an external antenna added, which almost doubled the reception of signals and was able to share the correct operation of all frequencies.

Now a powerful full-time code grabber can combine all the main four frequency ranges working in one device.

The device through quick one-button switching can instantly work in one of the ranges – 433,434,315,315fm, 868 MHz. And P19 mode.

And this is the whole American, European, Korean, Chinese and Japanese auto industry.

It works with a large list of full-time and delivered car alarms, including gates, barriers, shutters, shutters.

Frequency 433 MHz – Basic: European, Korean, Chinese and Japanese auto industry.

Frequency 434 MHz – VAG GROUP.

Frequency 315 MHz – Basic: will work with the entire list below, but now we are talking about cars in the US market.

The frequency of 315MHz is the same P22 (BMW) and many other brands and models of FM modulation, which are also used for the American market.

It is important to note that now at a frequency of 868 MHz, this is not about gates, shutters, and roller blinds, but about the complete list of the P22 (BMW) device that used to go as a separate device.

P19 – Mode: for a large list of additionally installed alarms.

Code grabber features:

- * Code grabber in Pandora DXL 3970 keychain

- * Additional antenna

- * Updates via "USB"

- * 10 memory locations

- * Take from 5 to 100 meters, depending on the model

- * Recognition of alarms (writes the brand of car on the display)

- * Enable PIN

- * Mute feedback on the host keychain

- * Implemented an additional communication channel (startup, trunk opening).

- * Effective display.

- * Backlight.

- * Battery indicator.

- * On / Off Mode Vibro Mode

- * Sound on/off mode

- * On / off mode of automatic cell switching after recording

- * Function accelerated catch-up code.

- * Powered by one AAA battery, or from a mini USB cable

Only verified models and years are listed, so the list may not be complete.
