

# **New Cryptograbber emulator Keyless Go – P30 Infiniti key emulator – Nissan codegrabber KeylessGO Only NEW**

## Description

Introducing the new product for 2022 – Cryptograbber Keyless Infiniti key emulator – Nissan P30

Codegrabber P30 Keyless Infiniti – Nissan

This is a simple and easy-to-use code grabber that replaces several themed devices. It is an emulator for keyless entry systems.

Developed on the basis of the Bluetooth Audio Adapter – visually it has no differences, no cables, antennas or any other external modifications. The P30 code grabber is the smallest and most compact device that has no analogues on the market. The P30 code grabber device allows you to open and start a car with a keyless access system without any preliminary preparations. The device independently diagnoses and in a matter of seconds emulates a native smart key, becoming its clone, which allows you to open the car, start the engine and make a move.

## Peculiarities:

- Bluetooth Audio Adapter case
- activation with a unique pin code
- menu with a choice of Russian or English language
- ease of operation with the device is available even for a child
- a week of work on one battery charge
- charging via USB
- the ability to update remotely

## Principle of operation:

Just walk up to the car door, touch or press the button on the keyless entry handle

the device records the signal from the car and within 10 seconds to 2 minutes selects the desired key, completely duplicating the native one.

The key can be stored in the instrument's memory.

Open, close, start and go at any time.

On our resource, we try to test and offer you only high quality products, tested by time and numerous tests, at affordable prices, with fast delivery, and we also provide technical support.
